Executive Summary

The World Orphanage Foundation conducted a mission to India on Sep 10th 2017 to analyze the overall status & need of the orphans in the different orphanage centers based on the feasibility study research. The feasibility study was carried out by the Head by WOF through interviews, discussions with the government institutions, Directors of orphanage centers. The main goal of the interviews and meeting was the initial introduction of World Orphanage Foundation, coordination and how to support the orphanage centers, women rights and avoid child abuse. WOF not only supports Orphanages but also Old Age Houses.

Helping and Donation of the Orphanages in Mumbai India

World Orphanage Foundation being an international NGO seeks to reach the poorest and the neediest. WOF team did a survey in Mumbai India and found out the orphanages in a very bad situation where there was only a celling and some metallic utensils. Young boys and girls were living in an unbearable condition. The rain was pouring and the orphanage was completely wet, the kids shrinking to one another with bare feet and empty stomachs. It was needless to say what they needed. Living in such condition is out of imagination and may seem just a tale for those who have never faced a condition as such, while maybe around more than half of population of India lives under poverty line.

Witnessing such a condition WOF took an immediate action and provide the Orphanage all what they needed like, Bed sheets, Blankets, Pillows and food items like, Flour, lentil, Rice and more which was enough for a six month of time.

Helping Old Age House in Mumbai

As it's said that everything in life is temporary, this applies for human age as well, and as human grows older they become more childish by nature. They can't take care of themselves and becomes more fragile and needs a care taker. But living in modern society and having a busy life is what makes it quite impossible for people to both take care of their day to day life, business, children and old age members (grandparents). This also has a solution which is old age house, a place where all old people are taken care of and is a home for them. But not all old age houses are having good facilities and are peaceful for aged people to live in. There are some with the lowest facilities and some people abandons their parents as they can't even take that much care of their parents or some doesn't want to.

WOF during its visit and survey of orphanages came across with an old age house, where very old people were living with low facilities and needed a hand to get better. WOF team approached them as well and helped them with eatables and clothing

Conclusion

The meetings, interviews and communications were held with different government institutions, Orphanage centers and old age house office in Mumbai, India and it was found out that some of the Orphanages and Old ages' houses were in a very bad condition with poor facilities provided for the orphans' interim of education facilities, health care, food, clothing, sports equipments etc. The World Orphanage Foundation took a step to help some of those orphanage centers and an old age house in India and provide the above facilities for the orphans elderly aged citizens in order to live as other citizens of India and treated the same way.
